DAZZEL ECO PLUS

DAZZeL Eco Plus is a super concentrated wastewater odor control formulated to obliterate the most repulsive odors over municipal wastewater plants and lagoons, and all food and ethanol processing facilities.

An ultra 20:1 concentrated essential oil complex derived from plant leaves and herbs binds with odor-causing molecules and leaves a clean fragrance in the air that extends as far as one-half mile.

The chemistry in DAZZeL Eco Plus absorbs with malodorous molecules and breaks them down to nothing. This does not mask odors, it neutralizes them and provides a long-lasting solution. This product is similar to ECOSorb™

DAZZeL Eco Plus is undiluted, but is very easily blended in water. One gallon makes 20 gallons of ready to use. This product is made to be diluted on site and available to be shipped all over the world.

Don't Mask Odors, Neutralize Them!

Many companies are selling a perfume for sewers. These fragrances may mask smells and work for short periods of time, but do not provide long-lasting wastewater odor control. DAZZeL Eco Plus is a no-chemical, all natural ingredients that provides a continuous odor-neutralizing result. What makes these natural oils unique is their ability to vitalize slowly (a little goes a long way). As it vitalizes, the odor molecules are broken down.

DAZZeL Eco Plus binds and absorbs with the odor-causing compounds to nullify it. This is similar to when lemon is used on fish, the fresh lemon isn't masking the smell, it's the citric acids reacting with the fatty acids. DAZZeL Eco Plus uses similar chemistry, but at a large scale.

Benefits

- Neutralizes ammonia, mercaptan, and sulfide based odors
- Eliminates the need for harsh chemicals or concealing fragrances
- Controls odors
- Counteracts odors quickly
- Nontoxic
- 5 gallons of concentrate makes 100 gallons of ready-to-use
