TECHNICAL UPDATE

SECLEAR G

SeClear G is an effective algaecide that we pair with PondZilla WW to best clarify the water. SeClear G is a chelated copper together with an ingredient that helps to lower phosphate. The copper ion is taken up by the algae which kills the plant.

PondZilla WW helps the copper ion get in the plant. Once SeClear wounds the algae PondZilla will degrade it. This is how you get the best water clarity, and prevent dead algae from contributing to the muck or sludge layer at the bottom of the pond.

We use it because it's effective.

SeClear, like all algaecides, is a temporary fix. We want to battle for the algae's nutrients which is sludge and muck. This is what we use our VitaStim Lagoon Line for; VitaStim Summer Slam, VitaStim Sludge Reducer, and VitaStim Polar.

Application:

*When used alone a higher dose is necessary.

*When used with **PondZilla** or **VitaStim**, a smaller or moderate dose is greatly effective.

For spray: Do not spray when wind speeds are over 15mph. Mix product with water at a 1:2 ratio (1 pounds of product, to 2 gallons of water)

SeClear' G dosing: 2-18pounds per acre/ft. Wait a minimum of 10-14 days between treatments.

$$(\text{Lagoon size in acres}) \times (\text{Lagoon Depth in ft}) = \text{acre/ft}$$

$$\text{Acre/ft} \times \text{Dose} = \text{Specific dose once per month}$$

SeClear (w/ PondZilla WW)			
Lagoon Size	Severe Dose 10 Pounds per acre/ft	Moderate Dose 5 pounds per acre/ft	Small Dose 2 pounds per acre/ft
4 Acres (20 acre/ft)	200 pounds a month	100 pounds a month	40 pounds a month
8 Acres(40 acre/ft)	400 pounds a month	200 pounds a month	80 pounds a month

***Assuming lagoon is 5ft deep**
