## TECHNICAL UPDATE

# VITASTIM CHEESE DEGRADER

It's not easy being cheesy!

VitaStim Cheese Degradator is great for cheese production facilities. Chew up fatty acids in your dairy waste stream to reduce grease, filaments, sludge hauling, and foaming. This product contains vitamins and bio-stimulants as well as bacterial culture concentrations that are five times higher than what's available through most catalogs or local supply salespeople.

No label-changing here. While some companies simply stick on a new label to market their products for different uses, we carefully isolate the strains needed to treat dairy waste specifically.

Combining this with Qwik-Zyme P, cheese and dairy plants will be unstoppable.

### Benefits:

- Breaks down milk sugars and fats
- Applied in aerobic basin/digester
- Anaerobic digesters
