TECHNICAL UPDATE

GREASEJETT

GreaseJett represents the best available technology to degrade grease deposits and control odors. GreaseJett will clean bad grease areas faster and more thoroughly resulting in less man hours spent cleaning. GreaseJett was designed specifically to enhance sewer jetting and can be added into the tank of your jetter truck.

Blended into GreaseJett is the synergy of several different biocatalysts that have the ability to liquefy and then break up grease deposits and degrade accumulations down to their elemental form.

GreaseJett does not move grease down the line, it catalyses grease. GreaseJett is all-natural and safe for the environment.

Benefits:

- Enhances sewer jetting effectiveness
- Catalyses grease
- Neutralizes odors
- Degrades grease before reaching the WWTP
- Operators like the smell

Can be added to:

- Jet Trucks
- Lift Stations
- Collection Systems
- Sewer Lines
