

PondZilla Pro

Adjuvant for Lagoon Algae Treatments

PondZilla Pro is a pond adjuvant that kick starts the bacteria in your water to more completely degrade dead matter and clarify the water, which in turn allows for more sun penetration for better removal of BOD, TSS, and fecal coliforms.

- **Adjuvant for Lagoon Algae Treatments:** PondZilla Pro boosts the effectiveness of algaecides and herbicides, ensuring thorough algae control and improved water clarity.
- **Algae Defense Breakdown:** Utilizes biocatalysts to enhance the penetration of copper algaecide, weaken algae's defenses, and help in the decomposition of dead plant material to prevent sludge accumulation.
- **Boosts Bacterial Performance:** PondZilla Pro stimulates natural bacteria to break down organics into simple sugars, allowing for quicker digestion and improved water quality.
- **Ecosystem Restoration:** Helps restore natural balance, breaks up floating scum, and works in harmony with the bacteria present in the water.

Lagoon Algaecide

Acre Feet	1	5	10
Argos	1.5 gal	7.5 gal	15 gal
PondZilla Pro	.5 gal	2.5 gal	5 gal

INSTRUCTIONS:

- Blend with 20 gallons of water per surface acre [Acre Feet = Surface Acres x Depth (in feet)]
- Spray evenly over surface targeted area
- Wear proper personal protective equipment when applying

FOR BEST RESULTS:

- Even distribution is required for best results
- For lagoons with oxygen limitations and severe algae problems, treat the lagoon in 2 or more stages

AVAILABLE SIZES:

- 5 gal Case
- 55 gal Drum
