

GreaseJett

Enhance Sewer Jetting Effectiveness

GreaseJett was designed specifically to enhance sewer jetting and can be added to your jetter truck's tank. GreaseJett will clean bad grease areas faster and more thoroughly resulting in fewer man-hours spent cleaning.

- **Odor Control:** In addition to grease removal, GreaseJett helps control odors commonly associated with grease buildup.
- **Speeds Up Cleaning:** Cleans grease-clogged areas faster and more thoroughly, reducing the need for excessive man-hours and effort.
- **Designed for Sewer Jetting:** Specifically formulated to enhance sewer jetting operations, GreaseJett can be added directly to jetter truck tanks.
- **Improved Efficiency:** Reduces the time and labor involved in grease removal, making it a highly efficient solution for maintenance teams.

Wastewater Plant Dosing

Step 1	Add 1 gallon of GreaseJett per 1,000 gallons of water in Jet truck
Step 2	Apply the solution as you jet the line upstream
Step 3	Let soak for 10 minutes. Jet again and retrieve line

INSTRUCTIONS:

- Hang block under incoming flow
- Hang at a depth that will have it fully submerged at the high water level
- Knock off remains into lift station

FOR BEST RESULTS:

- Pair with DAZZeL Sewer Sweetener for ultimate odor control.
- Pair with GreaseZilla for aggressive F.O.G. reduction.
- Pair with Bug On A Rope to limit future F.O.G. buildup.

AVAILABLE SIZES:

- 2.5 gal Container
- 55 gal Drum
- 275 gal Tote
