

# Bug On A Rope & GreaseZilla

Tackling the Toughest Grease

## Bug On A Rope

Bug On A Rope is a unique bacterial block for easy lift station grease control. Hang Bug On A Rope under the incoming flow and it will slowly degrade, releasing grease-eating bacteria into the lift station. Its base is rich in oxygen and key nutrients that help ensure maximum activity and reproduction of the bacteria as they are released.

For lift stations with significant accumulations of hardened grease, we recommend pairing Bug On A Rope with Greasezilla for the first 30 days. After the existing accumulations are degraded, Bug On A Rope by itself is a great way to prevent new grease accumulations.

## GreaseZilla

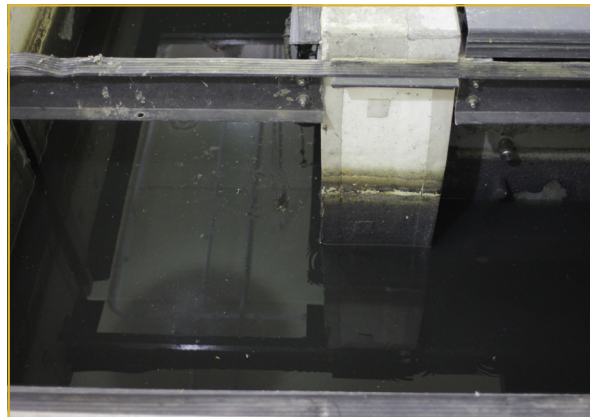

GreaseZilla is our most aggressive grease control treatment. It utilizes a liquid blend of bacteria and stimulants to digest the grease in an irreversible reaction. Use this in systems with hardened and old grease accumulations, or for lift stations with severe incoming grease loads.

- GreaseZilla is the most effective option for hardened grease
- Bug On A Rope prevents new grease accumulation

# Dose Rates

## Bug On A Rope & GreaseZilla

### Bug On A Rope Average Dissolving Rates

Flow Rate	Life Span
50,000 GPD	10 weeks
100,000 GPD	4 weeks
300,000 GPD	2 weeks

### GreaseZilla in Lift Stations, Collection Lines, and Sewer Lines

Flow Rate Gallons per day	Initial Dose Daily for 1-2 weeks	Maintenance Dose Twice per week
10,000 GPD	6.5 oz	6.5 oz
100,000 GPD	0.5 gal	0.5 gal
500,000 GPD	2.5 gal	2.5 gal
1 MGD	5 gal	5 gal

### GreaseZilla in Grease Traps

Grease Trap Size	Heavy Dose Twice per week	Maintenance Dose Once per week
1,000 gal	0.5 gal	8 oz
10,000 gal	5 gal	0.5 gal
20,000 gal	10 gal	1 gal

### Bug On A Rope

#### Available Sizes:

- Single 9 lb Bug On A Rope
- 4 pack of 9 lb Bug On A Rope

### GreaseZilla

#### Available Sizes:

- 5 gal case
- 55 gal drum
- 275 gal tote

### Bug On A Rope Jr

#### Available Sizes:

- For lift stations less than 20,000 GPD
- 4 pack of 3 lb Bug On A Rope Jr.
