

GreaseZilla

Biological Grease Control For Collection Systems

GreaseZilla is the fastest-acting grease control product for heavy grease and old hardened accumulations. It combines hydrophilic bacterial cultures with a fast-acting biocatalyst that quickly breaks up and digests grease in lift stations. It can also be used in kitchen drain lines and grease traps.

Unlike caustic or solvent based grease treatments, GreaseZilla will not result in a slug of grease being pushed down stream. The entirely biological action allows the grease to be irreversibly digested. And it is safe for the applicator as well as equipment.

*Ask your Technical Rep how GreaseZilla can lower BOD.

Tips:

- For old hardened grease, spray directly on the accumulations to ensure maximum contact time
- Use with Bug On A Rope

Dose Rates

GreaseZilla

GreaseZilla Dosing:

- For high grease loading or large grease accumulations, add daily
- For maintenance, add as little as twice per week, or can be metered in
- GreaseZilla sticks to grease and won't wash out

Available Sizes:

- 5 gal case
- 55 gal drum
- 275 gal tote

Lift Stations, Collection Lines, and Sewer Lines

Flow Rate Gallons per day	Initial Dose Daily for 1-2 weeks	Maintenance Dose Twice per week
10,000 GPD	6.5 oz	6.5 oz
100,000 GPD	0.5 gal	0.5 gal
500,000 GPD	2.5 gal	2.5 gal
1 MGD	5 gal	5 gal

Grease Traps

Grease Trap Size	Heavy Dose Twice per week	Maintenance Dose Once per week
1,000 gal	0.5 gal	8 oz
10,000 gal	5 gal	0.5 gal
20,000 gal	10 gal	1 gal

Notes:

For ongoing maintenance after lift station is cleaned up, try our "set it and forget it" Bug On A Rope
