

GreaseZilla

Biological Grease Control For Collection Systems

GET THE GREASE OUT. GreaseZilla is a powerful biological technology that removes hard, stuck-on grease rings while lowering odors. GreaseZilla is highly effective year-round.

- **Mitigate Foaming and FOG Outbreaks:** GreaseZilla is the premier solution for controlling heavy grease and preventing foaming, ensuring smooth operations throughout the plant.
- **Remove Hardened Lift Station Grease:** Specially formulated to dissolve and digest even the toughest hardened lift station grease, improving system flow and efficiency.
- **Optimizes Effluent Quality:** By lowering downstream Biological Oxygen Demand and Total Suspended Solids, GreaseZilla contributes to significantly improved effluent quality.
- **Multi-System Applicability:** From lift stations to grease traps, GreaseZilla excels in tackling grease buildup across various wastewater treatment systems.

Lift Stations, Collection Lines, and Sewer Lines

Flow Rate	Initial Dose <i>Daily for 1-2 weeks</i>	Maintenance Dose <i>Twice per week</i>
10,000 GPD	6.5 oz	6.5 oz
100,000 GPD	0.5 Gallon	0.5 Gallon
500,000 GPD	2.5 Gallon	2.5 Gallon
1 MGD	5 Gallon	5 Gallon

INSTRUCTIONS:

- Can be metered in
- For dosing for grease traps, contact a sales rep.

FOR BEST RESULTS:

- For high grease loading or large grease accumulations, add daily

AVAILABLE SIZES:

- 2.5 gal Container
- 55 gal Drum
- 275 gal Tote
