

# OxyPaks XL

## Sludge Digestion Accelerator

OxyPaks XL is a granular oxygen source used to accelerate the digestion of sludge and prevent odors in lagoons. The fizzing physical reaction of this product will assimilate oxygen into an otherwise anaerobic biomass.

- **Powerful Oxygen Boost:** OxyPaks XL enhances oxygen levels in wastewater lagoons and decorative ponds, accelerating the digestion of sludge and reducing muck.
- **Clarifies Water Column:** Works effectively to clear up the water column, ensuring cleaner and more transparent water in treated areas.
- **Minimizes Odors:** By increasing oxygen concentration, OxyPaks XL helps offset septic conditions and neutralizes existing odors, preventing new ones from forming.
- **Accelerates Sludge Breakdown:** The product's granular oxygen source percolates through sludge, enhancing bacterial degradation by expanding the accessible surface area for bacteria.

### Lagoon Clean Up-Dose

Surface Acre	Dose Rate <i>Once per month</i>
1 Acre	100 lbs

### Wastewater Plant Sand Filter Cleaning

Backwash	Dose Rate
10,000 gal	2-4 lbs

#### INSTRUCTIONS:

- Add "clean up dose" to lagoons once per month for sludge reduction, or to clarify water column.
- For larger lagoons, launching a boat to ensure even distribution is helpful

#### FOR BEST RESULTS:

- Focus additions on areas of greatest sludge accumulation
- VitaStim Sludge Reducer or Sludge Rx bacterial treatments for the best lagoon clean up.

#### AVAILABLE SIZES:

- 50 lb Container (Bulk)
- 50 lb Container (1lb Packets)
