Sludge Rx

The Newest Technology in Biological Sludge Reduction

A TABLET A DAY KEEPS SLUDGE AT BAY. Sludge Rx is a bacterial and biostimulant tablet designed to maximize sludge reduction. These tablets target sludge accumulations to lower effluent TSS, ammonia, phosphate, and improve effluent pH. Use Sludge Rx in lagoons and sludge storage basins to avoid costly dredging.

- **Mitigate Sludge Accumulation**: Sludge RX tablets transform dense sludge into beneficial bacterial biomass, aiding in maintaining clean wastewater systems.
- **Enhance Water Quality:** By reducing sludge volume, the tablets also contribute to lowering effluent TSS, ammonia, phosphate, coliforms, and pH.
- **Advanced Tablet Technology:** Dense tablets deliver active ingredients straight to the sludge, maximizing impact and efficiency.
- **Flexible Application:** Easy to apply across the treatment area and effective in all weather conditions, making it a practical choice for operators.

For Lagoons

Surface Area	Dose Rate *Once per month*
1 acre	60 lbs

For Aeration Basins

Surface Area	Dose Rate *Twice per month*
10,000 ft^3	30

AVAILABLE SIZES:

- 30 lb Container (Bulk)

INSTRUCTIONS:

- Spread evenly over target area. This generally requires access to a boat to broadcast evenly
- Application doesn't need to be perfect

FOR BEST RESULTS:

- Pair with OxyPaks XL to accelerate sludge reduction
- Works best above 55°F (12.78°C) water temperature.
- Fastest sludge reduction in summer months when water is at its warmest
