Soluble Micronutrients Analysis for Anaerobic Processes

ANAEROBIC CHEMISTRY SCREENING \$1,150.00 PROACTIVE ANAEROBIC CHEMISTRY SCREENING \$4,300.00 <i>FREE Return Shipping & Pick Up Now Included</i>	Soluble Nutrient Analysis:			
	• Aluminum	• Calcium	• Lead	• Potassium
	• Arsenic	• Chromium	• Manganese	• Selenium
	• Barium	• Cobalt	• Magnesium	• Sodium
	• Boron	• Copper	• Molybdenum	• Zinc
	• Cadmium	• Iron	• Nickel	
	Sludge Composition Analysis:			
	• Total Solids %	• Volatile Solids %	• TDS	• TSS
	• COD (mg/L)	• Alkalinity	• pH	• Total Nitrogen

Aquafix Laboratories

Soluble Trace Elements Testing for Anaerobic Processes

Obtaining a sample:

When possible, obtain samples of digester mixed liquor and fill the bottles full.

If obtaining these samples is not possible then a 24-hour composite of digester influent will work.

Please note on the chain of custody which you are including.
