Total Floc

Nitrient Remediation for Wastewater Lagoons

TotalFloc is a powerful biological flocculant and phosphorus binder designed for wastewater lagoon systems that struggle with excess phosphorus and poor effluent quality. This easy-to-use liquid product combines beneficial bacteria and phosphorus binding materials. It instantly binds and removes phosphorus, while also reducing BOD, TSS, and total nitrogen. By improving water quality and helping lagoons meet strict permit limits, TotalFloc keeps systems running smoothly and discharging cleaner water.

- **Reduces Total Phosphorus:** Quickly lowers phosphorus levels to help lagoon systems meet discharge permits.
- **Improves Overall Effluent Quality:** Lowers BOD, TSS, and total nitrogen for cleaner, clearer effluent.
- **Safe and Simple Application:** Easy-to-apply non-toxic formula designed specifically for wastewater lagoons.
- **Supports Long-Term Compliance:** Helps lagoon systems maintain compliance and avoid costly penalties.

For Water Column Nutrients

Lagoon Size	Dose Rate
1 Surface Acre	25-110 gallons*

AVAILABLE SIZES:

- 5 gal Case (2 2.5 gal Containers)
- 55 gal Drum
- 275 gal Tote

INSTRUCTIONS:

- Spray evenly over the surface of the lagoon.
- *Dosing rate varies based on lagoon conditions, loading, and effluent goals.

FOR BEST RESULTS:

- Repeat applications as needed to maintain effluent quality.
