

VitaStim Grease

Bacterial Cultures & Stimulants to Speed Grease Digestion

VitaStim Grease contains bacterial cultures along with key probiotics for chewing up high levels of grease and fatty acids. The probiotics help to maintain the population of grease digesting bacteria, as well as provide a boost to the native bacteria.

- **Accelerated Grease and Fatty Acid Digestion:** VitaStim Grease contains specialized bacterial cultures and probiotics that break down high levels of grease and fatty acids in wastewater systems.
- **Boosts Native Microbial Populations:** The probiotics enhance the population of grease-digesting bacteria, supporting and stabilizing biological treatment.

Grease in WWTP, Lift Stations, or Lagoons

Flow Rate	Initial Dose <i>Daily dose for one month</i>	Maintenance Dose <i>Daily after one month</i>
100,000 GPD	0.5 lb	0.5 lb <i>Every other day</i>
500,000 GPD	2.5 lb	1 lb
1 MGD	5 lb	2.5 lb

AVAILABLE SIZES:

- 30 lb Container (½ lb packets)
- 30 lb Container (1 lb packets)

INSTRUCTIONS:

- Add once per day to anaerobic digester or lift station

FOR BEST RESULTS:

- Pair with Qwik-Zyme L for anaerobic digesters
- Pair with GreaseZilla for bad lift station grease
